

Modernizing IT Networks for Transportation

Public transportation agencies seek innovative ways to connect systems and business assets, improve the experience of moving people and goods, and reduce operational cost. AI-driven networking can help agencies shift from inflexible, costly IT networks and deliver superior experiences that improve ridership loyalty while simplifying IT operations and lowering costs.

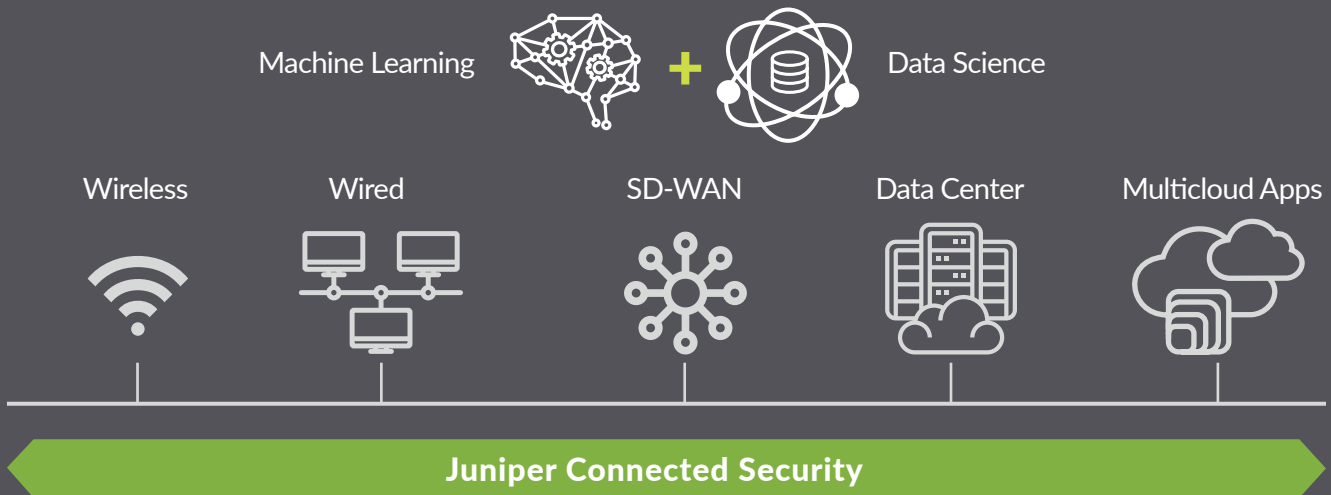

Transportation Ecosystem

Modernize and Get Ahead with AI-Driven Networking

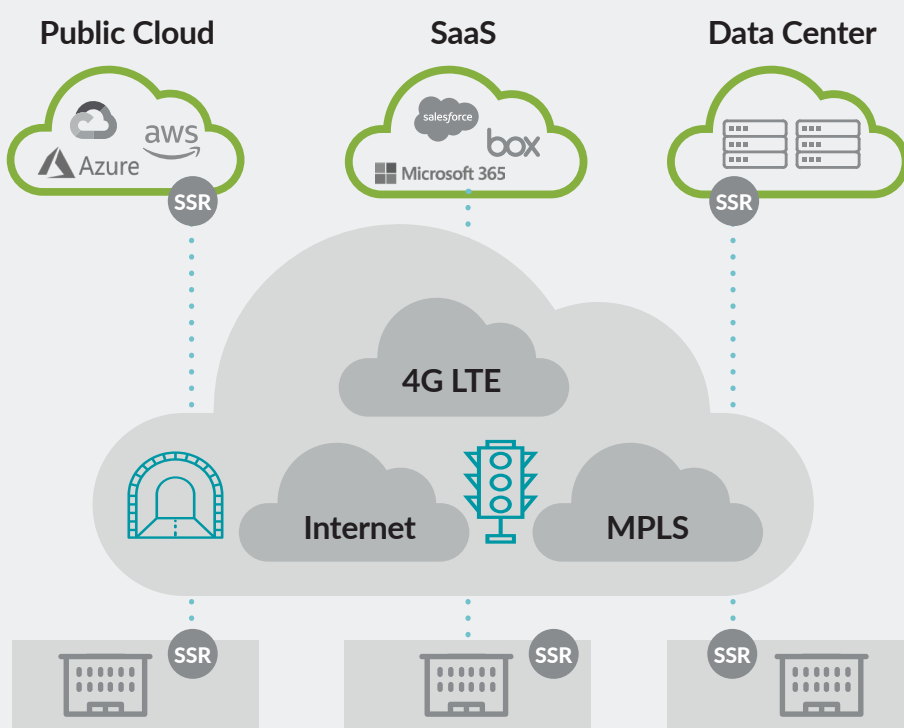

As a leader in AI for IT, Juniper uses insight, automation, and action to bring unprecedented simplicity, reliability, and security from client to cloud. An AI-driven network enables your agency to deliver industry-leading experiences, improve total cost of ownership, and fuel innovation.

Unifying Operations Efficiency and Citizen Experience

Create an Experience-First Network with Juniper

Boost user experiences across private and public networks with Juniper® Session Smart™ SD-WAN and AI-driven insight, automation, and action. Transition to a modern SD-WAN to increase application performance and lower OpEx.

With a Juniper Session Smart SD-WAN, driven by Mist AI, transportation agencies can:

- Optimize citizen experience and increase ridership loyalty
- Reduce IT costs and complexities
- Strengthen Zero Trust Security
- Innovate, modernize, and transform from client to cloud

Transform from Client to Cloud with Juniper Session Smart SD-WAN

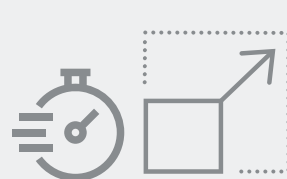

Breakthrough Economics

Tunnel-less architecture enables **75%** reduction in headend infrastructure costs

35%-50% reduction in bandwidth costs

Speed, Scale, and Reach

Deploy new services in **minutes**

Scale rapidly up to **10,000** edges

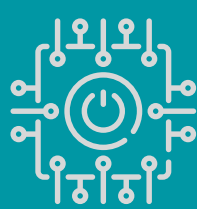

Optimize applications for low-bandwidth links

Network as Agile as the Cloud

Extend a session-based, fine-grained routing and application-aware boundary-free fabric from client to cloud

Deploy cloud applications **faster** and with greater **resilience** to cloud issues

Get your transportation agency moving faster with experience-first networking from Juniper.
